TECHNOLOGIES

We are committed to deliver exceptional analytical services through our focus on QC methodologies, GLPs, development of our technical expertise, and capabilities to ensure our results reflect our dedication to quality workmanship.

ACCURATE TESTING

Test	Pricing (\$)	Vol. Req. (mL)
Microbiological Plating (Yeast Mold Bacteria count)	35	500
Free Sulphites (FIAS)	15	100
Total Sulphites (FIAS)	15	100
Alcohol (Distillation & Density)	25	300
pH	7	200
Titrateable Acidity	15	100
Volatile Acidity	25	100
Glucose Fructose (Enzymatic)	35	100
Glucose Fructose Sucrose (Enzymatic)	40	100
Brix/Baume/Specific Gravity/Density	10	100
Heat Stability (8 hours 80C Turbidimeter)	15	300
Cold Stability	15	300
Viable Yeast Count (staining & haemocytometer)	25	200
Sorbic Acid (UVVis Spectrophotometry)	25	200
Primary Amino Nitrogen	35	100
Ammonia Nitrogen (enzymatic)	35	100
Yeast Assimable Nitrogen (enzymatic)	60	100
Malic Acid (enzymatic)	35	100
VI1 EU Export Analysis Package	250	750
Analysis Package for Sample Submission to BCVQA Panel (pH, TA, RS, VA, Alc, TSO2, FSO2)	100	750
Total Dry Extract	25	300
Reducing Sugar	25	100
Citric Acid	25	100
Bentonite Addition Trials	CALL	CALL

World Class Customer Service
We are equipped for all your basic wine chemistry needs, you can rely on us for accuracy, precision and confidentiality.
